Highway #1 Survey:

An Overview of Tourist Traffic Entering Manitoba Via Highway #1 East and West Per Month and for the Years 1983 and 1984

Michael Bell
Business Development and Tourism
February, 1985

INTRODUCTION

Tourism is a dynamic phenomenon with seasonal and annual variations. Continuous measurement is therefore required to provide a sound data base on which tourism marketing strategies can be formulated.

Statistics Canada publishes monthly and annual statistics on the volume of tourist traffic entering Manitoba by air and road from the south. Vehicle entry data are reported for each border crossing point on the Manitoba-United States border. Visitors arriving by air are recorded by province of entry.

Interprovincial movements of visitors are not reported by Statistics Canada. It was due to this data deficiency that this survey was originally implemented. The purpose of this survey is to establish the origin of visitors entering Manitoba along the major east-west artery, Highway #1.

NOTE: 1983 is the first year the data for this report was tabulated using a computer.

Therefore: Some minor variations exist in the 1982/83 report compared to the 1981/82 report due to variation in calculating and rounding techniques. These variation do not add any significant error to this report.

Also note that in the origins sections province/state totals may not sum to the regional sub-totals due to calculating methods and rounding techniques.

METHODOLOGY

The Department of Business Development and Tourism maintains two electronic vehicle counters on the inbound lanes of Highway #1 East (Manitoba/Ontario boundary) and #1 West (Manitoba/Saskatchewan). The counters serve to continuously record (24 hours a day, year round) traffic flows of vehicles entering the province (See Appendix B).

During the peak tourist months of May-September two survey staff conduct a sample survey of vehicles entering the province (see survey schedule, Appendix A). The proportions established during these surveys are applied to the total vehicle counts for the month.

Generally it is considered that the survey procedure established is statistically sound and reliable. However, it is also believed that the license plate observation of origin is subject to a certain degree of error encountered when identifying license plate origin.

NOTE: Statistical methodology for tables included with this report is summarized under each table as to source and computation method.

SECTION I: TRAFFIC DATA FOR HIGHWAY #1 EAST, WESTBOUND

A. Total Traffic Counts, 1983 - 1984:

Table 1 depicts the total vehicle traffic entering Manitoba via Highway #1 East during the years, 1983 and 1984.

Method: The actual figures listed for each month are derived from the total traffic summary (Appendix B) acquired from traffic counter tapes. The percentage is expressed as a part of the total traffic for the year.

In 1984, the peak traffic flow on Highway #1 East occurred in July (18.0% of the annual total). This is a slight increase from the same period last year (17.59% of annual total).

The next heavily travelled months were August (16.97%), June (10.89%), and September (10.56%).

For the peak months, only June suffered a slight decline in vehicle traffic from 1983 (0.33%).

The peak months, from June through September, counted 56.42% of traffic for Highway #1 East in 1984. This is 1.17 percentage points more than for the comparable period in 1983.

Overall, the total volume of traffic entering Manitoba for 1984 rose 1.22% to 468,539 vehicles from 1983 (Table 1).

B. Total Tourist Traffic, 1983 - 1984:

Total tourist traffic is derived by summarizing the total number of non-Manitoba resident license origins from the hourly and daily survey sheets and expressing this figure as a percentage of the total traffic during the survey time for each month.

This percentage is multiplied by an adjustment figure of 0.9 (which represents a proportionate adjustment to the original 1968 survey data) to determine the percent of the total vehicular traffic that represents non-Manitoba license plates (refer to Table 2 of this report).

Table 3 compares the non-resident vehicle percentage of the total traffic for each month during the years 1983 and 1984.

The proportion of non-resident traffic in relation to total vehicle traffic has shown a decline from 1983.

Declines in total tourist vehicles entering the province from the east were indicated in all but two months, September and November of 1984.

NOTE: For the months of November to May 1983 and 1984, the percentage of non-resident traffic determined in the survey completed in May of both years, was used tc estimate the total non-resident tourist traffic for each of the off-season months. (January-April and October-December.)

* FROM TABLE 1.
** BASED ON THE ADJUSTED TOTAL IN TABLE 2 AS DETERMINED IN THE SURVEYS COMPLETED DURING THE MONTHS OF MAY TO SEPTEMBER 1983 AND 1984. PROPORTIONS FROM TABLE 2.

C. Origin of Tourist Traffic on Highway #1 East, 1983 - 1984:

Tables A,B,and C outline the origin of tourist vehicles on a monthly as well as cumulative basis during 1983 and 1984.

Percentage distribution and percent change are also provided to compare the month to month and annual variances in funds.

For the months of January, February, and March (first quarter), 1984, there were a total of 15,997 Canadian tourist vehicles (non-Manitoba residents) and 895 United States tourist vehicles which entered Manitoba via Highway #1, East.

For Canadian tourist vehicles this compares unfavourably as there was a decline from the 1983 level of 9.60%. However, for American travel for the same time period, traffic more than tripled in 1984 (214.75% increase).

For the second quarter (April, May, and June), 1984, indicated a total of 29,826 Canadian tourist vehicles and 3,543 United States tourist vehicles entering Manitoba from the east. This represents a decline of 9.30% for Canadian traffic from the same period in 1983. Again, American traffic also increased (80.89%) but not as dramatically as the period previous to this.

For the third quarter (July, August, and September), 1984, indicated a decline of Canadian traffic (5.60%). United States (0.23%) tourist traffic rose marginally compared to the same months in 1983. This is by far the busiest period for vehicle traffic entering Highway #1 East as one-half of all traffic was recorded from this quarter.

For the fourth quarter (October, November, and December) tourist traffic of Canadian vehicles declined (7.55%) while those of American origin increased (46.48%) from the same period in 1983.

Overall, a total of 131,534 Canadian tourist vehicles entered Manitoba by Highway #1 East during 1983, indicating a decrease of slightly over ten thousand vehicles or 7.29% from 1983.

The largest regional decline in tourist traffic was from the Central Provinces, especially Quebec, with 8.48% fewer tourist vehicles than in 1983.

The United States accounted for 14,868 tourist vehicles, an increase of 22.31% from 1983.

The largest regional proportions of U.S. tourist traffic in 1984 originated from the West-North Central area (5,908) followed by Pacific (2,343). Both areas indicated increases in tourist traffic from that of the previous year of 44.71% and 18.96% respectively.

NOTE: "ERR" messages have been recorded where division by zero has taken place. This indicates that there has been no vehicle traffic changes between the two years of comparison.

D. Total Tourist Visitors, 1983 - 1984 (Highway #1 East):

With the assumption that the total number of tourists per vehicle* being established at 2.90 persons* per vehicle, it would appear that a total of 424,565 tourists used this route during 1984.

This represents a 4.95% decline in tourists as compared to the same period in 1983.

*"Manitoba Auto Exit Survey, 1975" conducted by P.M. Associates of Winnipeg, Manitoba.

SECTION II: TRAFFIC DATA FOR HIGHWAY #1 WEST, EASTBOUND

A. Total Traffic Counts, 1983 - 1984:

Table 4 presents the total vehicle traffic entering Manitoba via Highway #1 West during the years 1983 and 1984.

The flow of traffic into the province from the West during 1984 decreased 2.11%. A most significant decline occured in the month of December as vehicle traffic declined 13.73%.

23-Jan-85

B. Total Tourist Traffic, 1983 - 1984 (Highway #1 West):

As previously explained in Section I-B, the method of determining the total number of non-Manitoba resident license plate origins is derived from the survey sheets and this figure is expressed as a percentage of the total traffic during the survey time for each months.

The difference between Highway # 1 East and Highway #1 West is the adjustment figure 0.9 for #1 East and 0.951 for #1 West (Table 6).

Table 6 also illustrates the actual survey data showing the percent of tourist vehicles during the survey periods.

The relative proportions of non-Manitoba residents entering Manitoba via Highway #1 West during 1984 decreased 1.55%. The most significant decline was registered in the month of December (10.98%).

Table 7 compares the percentage of non-resident vehicles to the total traffic for each month during the years 1983 and 1984.

** BASED ON THE ADJUSTED TOTAL IN TABLE 6 AS DETERMINED IN THE SURVEYS COMPLETED DURING THE MONTHS OF MAY TO SEPTEMBER 1983 AND 1984. PROPORTIONS FROM TABLE 6.

C. Origin of Tourist Traffic, 1983 - 1984:

Tables D,E, and F summarize the origin of tourist vehicles entering Manitoba via Highway #1 West on a monthly and cumulative basis during 1983 and 1984.

Percentage distribution and percentage change are also provided to compare the monthly and annual variances in trends.

During the main tourist season (third quarter months), 60,167 Canadian (non-Manitoba residents) and 7,122 United States tourist vehicles entered Manitoba via Highway #1 West in 1984.

This represents declines of 1.45% and 4.75% respectively as compared to 1983.

For the year 1984, 149,026 Canadian tourist vehicles entered Manitoba via Highway #1 West reflecting a decrease of 1.20% from 1983.

The United States accounted for 11,868 tourist vehicles, a decrease of 5.68%.

D. Total Tourist Visitors, 1983 - 1984:

Visitors entering the Province from the West on Highway #1 totalled 466,590 for the year 1984 (Table 8).

This represents a decline of 1.55%.

Declines were indicated for the following months in 1984 for inbound tourist traffic on Highway #1 West: April, June, July, September, October, November, and December.

NOTE: As previously stated in I-D, 2.90 persons per vehicle is the

SECTION III: TRAFFIC DATA FOR HIGHWAY #1 EAST AND WEST, FOR 1983 AND 1984

A. Summary and Conclusions

Table 9 (A and B) summarizes the total vehicle entries into Manitoba via Highway #1 East and West for peak month and for the years 1983 and 1984 as to vehicle origin and percent distribution.

Overall, 1983 accounted for a total of 462,881 vehicles entering Manitoba via Highway #1 East of which 30.65% were Canadian (non-Manitoba residents) and 2.02% were of U.S. origins.

In 1984, the total vehicle entries via Highway #1 East totalled 468,539, an increase of 1.22% (Table 9).

This increase is attributed to an increase of 22.13% in United States tourist traffic combined with a decrease of 7.29% in Canadian tourist traffic and an increase of 4.30% in "Other Traffic".

Total traffic on Highway #1 West decreased 2.11% in 1984 from 1983 (Table 5).

This decrease is attributable to a decline of 5.68% in United States tourist traffic, and 1.20% in Canadian tourist traffic with a decrease in "Other Traffic" of 2.61% from 1983.

As previously mentioned, the total number of tourists is based on the "Manitoba Auto Exit Survey" conducted by P.M. Associates of Winnipeg, Manitoba in 1975, which determined that the average party size per vehicle equalled 2.90 persons.

This figure multiplied by the total tourist traffic figure equals the total number of tourists entering the Province of Manitoba.

Based on this methodology, in 1984, a total of 284,394 tourists entered Manitoba via Highway #1 East during May to September, indicating a decline of 4.77% from the same period in 1983 (Table 11).

During May to September 1984, Highway #1 West indicated a decline of 0.17% to 277,927 tourists compared to the same period in 1983.

The total volume of tourist traffic on Highway #1 into Manitoba (Table 12) decreased by 3.20% which is due to a decrease of 4.95% on Highway #1 East and a decline of 2.11% on Highway #1 West.

Overall, Canadian tourist traffic decreased 4.15% from 1983, which is attributable to a 7.29% decline on Highway #1 East and a 1.20% decline on Highway #1 West.

United States tourist traffic indicated a total increase of 8.07%. This was a result of a 22.31% increase in traffic on Highway #1 East and a 5.68% decrease on Highway #1 West.
